February 2013

To Whom It May Concern:

I was Michael Kennedy's supervising psychologist when he was employed with Central Consolidated School District #22 and Dulce School District, both in New Mexico. The supervision lasted for twelve months beginning in the Spring of 2011. We have collaborated on school psychology issues since that time. During this time, Michael has demonstrated very thorough and professional skills in evaluation and the analysis of data. He is familiar with a wide variety of evaluation instruments. He is insightful and looks for ways to collect and explain data that will maximize student learning and functioning. Michael has always kept the needs and concerns of the students paramount in his work. He works well with students, staff, and parents.

Michael asks questions and seeks advice when needed to improve his work. He always strives to improve and increase his school psychology skills. Michael has strong skills in counseling psychology and does well working with students in that capacity. Michael will be a positive and production asset as a school psychologist for any school district. I highly recommend him for any school psychologist position.

Please feel free to contact me if you have any further questions.

Sincerely,

Clyde A. Howell
